	Date 20 12 21
Expt. No. 09	Page No. <u>35</u>
Aim:	
Perform	solubility study of different exude drugs.
Reference	
Mohamma CBS pub	ication, page No:
Requirem	ent:-
Glassware	e:-Beaker, Test tube, glass rod.
Chemical	s:- Methanol, Ethanol, Acetone.
7	Test tube holder, Test tube stands, Test tube cleaning boush, pasteur pipettes.
Theory:	
that co	drug: - Crude drugs are plant or animal drugs ntain natural substances that have undergone e process of collection and drying.
Solubility the sol	:- Solubility is the ability of a substance. ute, to form a solution with another
substan	ce, the solvent. Insolubility is the
opposite	property, the inability of the solute to ch a solution.
from Su	ch a solution.

Expt.	No Page No 36	
	liscosity: - Viscosity is the resistance of a fluid to flow. This resistance acts against the motion of any solid object through the fluid and also against motion of the fluid itself past stationary obstacles. Viscosity of a liquid is constant at a given temperature and is an index of its composition. Procedure:	and the state of
	rzocenwie.	
	Take 4 test tube. Clean and day each test tube	
2.	One by one take test tube and fill it water, methon ethanol and acetone respectively.	01,
3.	Then take one crude drug and but it in all four test tube. Mix it and leave for sometime.	
4.	Now check its solubility and make a list.	
5.	And then clean the test tube and repeat the process. 2, 3 and 4 to check the solubility of all other given conde dougs.	
	Result')	
	Solubility of coude doug has been successfully checked of the given samples.
